

## Syllabus checklist 7 th sem

### Entrepreneur ship

- ☐ UNIT-I
- ☐ Entrepreneurial perspective: Foundation,
- ☐ Nature and development of entrepreneurship,
- ☐ importance of
- ☐ entrepreneurs,
- ☐ Entrepreneurial Mind,
- ☐ Individual entrepreneur Types of entrepreneurs,
- ☐ Entrepreneurship in India
- ☐ UNIT-II
- ☐ Beginning Considerations: Creativity and developing business ideas;
- ☐ Creating and starting the venture;
- ☐ Building
- ☐ a competitive advantage;
- ☐ Opportunity recognition,
- ☐ Opportunity assessment;
- ☐ Legal issues
- ☐

### DSCC

- ☐ UNIT-I
- ☐ Introduction to Distributed Systems:
- ☐ Characteristics of Distributed Systems-Introduction,
- ☐ Examples of Distributed systems (Client server,
- ☐ peer to peer,
- ☐ grid and cloud computing),
- ☐ Advantages of distributed systems,
- ☐ System models -Introduction,
- ☐ Architectural and Fundamental models,
- ☐ Networking and Internetworking,
- ☐ Interposes Communication ( message passing and shared memory),
- ☐ Distributed objects and Remote Method Invocation,

- ☐ RPC,
- ☐ Events and notifications,
- ☐ Case study-Java RMI.
- ☐ UNIT-II
- ☐ Synchronization:
- ☐ Time and Global States-Introduction,
- ☐ Logical Clocks,
- ☐ Synchronizing physical clocks events and Process states,
- ☐ Synchronizing physical clocks,
- ☐ logical time and logical clocks,
- ☐ global states,
- ☐ distributed debugging,
- ☐ Coordination and Agreement:
- ☐ Distributed mutual exclusion,
- ☐ Elections,
- ☐ Multicast communication,
- ☐ consensus and related problems.
- ☐

#### IPR

- ☐ UNIT-I
- ☐ Understanding & Overview of IPR Regime & Patents:
- ☐ Introduction,
- ☐ Need of Intellectual Property Rights,
- ☐ Types of Intellectual property,
- ☐ Rationale for protection of IPR,
- ☐ International Organizations,
- ☐ Agencies and Treaties,
- ☐
- ☐ Importance of Intellectual Property Rights,
- ☐ IPR in India:
- ☐ Genesis and development,
- ☐ Impact of IPR on development,
- ☐ health agriculture and genetic resources in India. ♦ Patents:
- ☐ Definition of TRIPS,

- ☐ Kind of inventions protected by Patent,
- ☐ Process and Product Patent,
- ☐ Double Patent,
- ☐ Legal requirements for patents,
- ☐ Patent Application process,
- ☐ Searching a patent,
- ☐ Drafting and Filing of a Patent,
- ☐ Type of patent applications,
- ☐ Patent Specification and Claim,
- ☐ Management of IP Assets and IP Portfolio,
- ☐ Layers of International Patent System:
- ☐ National,
- ☐ Regional and International options
- ☐ UNIT-II
- ☐ Trademarks & Copyrights:
- ☐ Rights of Trademark,
- ☐ Purpose and Function of Trademark,
- ☐ Trademark registration,
- ☐ Trademark Acquisition,
- ☐ Trademark protection,
- ☐ Trademark Registration process. ♦ Law of Copy Rights,
- ☐ Rights and Protection covered by Copyright,
- ☐ Infringement of Copyright under Copyright Act,
- ☐ Distinction between related rights and copyright,
- ☐ Celebrity rights,
- ☐ Academic integrity or Plagiarism

## MACHINE LEARNING

- ☐ UNIT-I
- ☐ Introduction:
- ☐ Machine learning,
- ☐ terminologies in machine learning,
- ☐ Perspectives and issues in machine learning,
- ☐ application of Machine learning,

- ☐ Types of machine learning:
  - ☐ supervised,
  - ☐ unsupervised,
  - ☐ semi- supervised learning. Review of probability,
  - ☐ Basic Linear Algebra in Machine Learning Techniques,
  - ☐ Dataset and its types,
  - ☐ Data preprocessing,
  - ☐ Bias and Variance in Machine learning ,
  - ☐ Function approximation,
  - ☐ Overfitting
- ☐ UNIT-II
- ☐ Regression Analysis in Machine Learning:
  - ☐ Introduction to regression and its terminologies,
  - ☐ Types of regression,
  - ☐ Logistic Regression ♦ Simple Linear regression:
    - ☐ Introduction to Simple Linear Regression and its assumption,
    - ☐ Simple Linear Regression Model Building,
    - ☐ Ordinary Least square estimation,
    - ☐ Properties of the least-squares estimators and the fitted regression model,
    - ☐ Interval estimation in simple linear regression ,
  - ☐ Residuals ♦ Multiple Linear Regression:
    - ☐ Multiple linear regression model and its assumption,
    - ☐ Interpret Multiple Linear Regression Output(
      - ☐ R-Square,
      - ☐ Standard error,
      - ☐ F,
      - ☐ Significance F,
      - ☐ Coefficient P values),
      - ☐ Access the fit of multiple
      - ☐ linear regression model (
        - ☐ R squared,
        - ☐ Standard error) ♦ Feature Selection and Dimensionality Reduction:
          - ☐ PCA,

- ☐ LDA,
- ☐ ICA
- ☐

## Reinforcement Learning and deep learning

- ☐ UNIT-I
- ☐ Reinforcement Learning Foundation: Introduction to Reinforcement learning and its terms,
- ☐ Features and elements of RL,
- ☐ Defining RL Framework and Markov Decision Process ,
- ☐ Policies,
- ☐ Value Functions and Bellman Equations,
- ☐ Exploration vs. Exploitation,
- ☐ Code Standards and Libraries used in RL (Python/Keras/Tensorflow)
- ☐ Tabular Methods and Q-networks:
  - ☐ Planning through the use of Dynamic Programming and Monte Carlo,
  - ☐ Temporal-Difference learning methods (TD(0),
  - ☐ SARSA,
  - ☐ Q-Learning),
  - ☐ Deep Q-networks (DQN,
  - ☐ DDQN,
  - ☐ Dueling DQN,
  - ☐ Prioritised Experience Replay)
- ☐ UNIT-II
- ☐ Policy Optimization: Introduction to policy-based methods,
- ☐ Vanilla Policy Gradient,
- ☐ REINFORCE algorithm and stochastic policy search,
- ☐ Actor-critic methods (A2C,
- ☐ A3C) ,
- ☐ Advanced policy gradient (PPO,
- ☐ TRPO,
- ☐ DDPG),
- ☐ Model-Based RL: Model-based RL approach◆Recent Advances and Applications: Meta-learning. Multi-Agent Reinforcement Learning,

- ☐ Partially Observable Markov Decision Process,
- ☐ Applying RL for real-world problems
- ☐

## **Pattern Recognition and Computer vision**

- ☐ UNIT-I
- ☐ Induction Algorithms.
- ☐ Rule Induction.
- ☐ Decision Trees.
- ☐ Bayesian Methods.
- ☐ Overview.
- ☐ Naïve Bayes.
- ☐ The Basic Naive Bayes Classifier.
- ☐ Naive Bayes Induction for Numeric Attributes.
- ☐ Correction to the Probability Estimation.
- ☐ Laplace Correction.
- ☐ No Match.
- ☐ Other Bayesian Methods.
- ☐ Other Induction Methods.
- ☐ Neural Networks.
- ☐ Genetic Algorithms.
- ☐ Instance-based Learning.
- ☐ Support Vector Machines.
- ☐ UNIT-II
- ☐ About Statistical Pattern Recognition.
- ☐ Classification and regression.
- ☐ Features,
- ☐ Feature Vectors,
- ☐ and Classifiers.
- ☐ Pre-processing and feature extraction.
- ☐ The curse of dimensionality.
- ☐ Polynomial curve fitting.
- ☐ Model complexity.

- ☐ Multivariate non-linear functions.
- ☐ Bayes' theorem.
- ☐ Decision boundaries.
- ☐ Parametric methods.
- ☐ Sequential parameter estimation.
- ☐ Linear discriminant functions.
- ☐ Fisher's linear discriminant.
- ☐ Feed-forward network mappings.
